Bilateral Meetings

- 29. 05. 2015 Friday (13:00 p.m. - 16:00 p.m.)

Description

Our Cloud-native POS and Back Store Software as a Service (SaaS) is designed specifically for Chains of any size: franchised, direct or mixed. We have more than 20 years' experience in software for Retail and our award winning last generation has been designed from the ground to leverage the power of modern Cloud platform to deliver a simple to use, professional and highly reliable service all over the world in a very cost effective way.

No investment, no long term commitment or minimum quantity but just a fee for each workstation. You can start with one or few stores and grow without limits. Our aKite (as the most direct link to the stores is up in the Cloud) is multi-language, multi-currency and multi-tax. POS is designed to work seamlessly connected and disconnected and without any special requirements on hardware and Internet connection.
